PROFESSIONAL SUMMARY

IT Automation Engineer with 8+ years of experience across IT automation, identity and access management, endpoint management, SaaS administration, IT operations, ITSM, and security. Experienced in designing API-driven automation workflows and internal platforms to reduce manual IT operations, improve access governance, and strengthen auditability. Hands-on experience with Google Workspace, Okta, Slack, Jira, GitHub, Google Apps Script, REST APIs, Python, PowerShell, Docker, AWS, GCP, n8n, and MDM platforms. Experienced in user lifecycle automation, access provisioning, reconciliation, endpoint administration, SaaS governance and security operations.

CORE SKILLS

- **IT Automation:** Python, PowerShell, Bash, Google Apps Script, REST APIs, Webhooks, n8n, AWS Lambda
- **Identity & Access Management:** Google Workspace, Okta, OAuth 2.0, JWT, SSO, MFA, RBAC, SCIM, Google Groups, JML, SaaS access governance
- **Endpoint & MDM:** Kandji, JumpCloud, Jamf, Scalefusion, ManageEngine MDM, Google MDM, Windows, macOS, Zero-Touch Provisioning, Patch Management
- **Application & Platform:** FastAPI, Pydantic, Alembic, Next.js, React, TypeScript, Tailwind CSS
- **Cloud & Infrastructure:** AWS, GCP, AWS IAM, AWS Lambda, Docker, GitHub Container Registry, API Integrations
- **ITSM & SaaS:** Jira, Jira Service Management, Slack, GitHub, Microsoft 365, Zendesk, GroWrk
- **Security & Compliance:** CrowdStrike Falcon, SentinelOne, Forcepoint, McAfee DLP, Gitleaks, Wazuh, OSSEC, SOC 2, ISO 27001, PCI DSS
- **Networking & Email Security:** DNS, DHCP, VPN, NAT, segmentation, Fortinet, SonicWall, SPF, DKIM, DMARC, SendGrid, Mailjet

PROFESSIONAL EXPERIENCE

Turing - IT Automation Engineer

May 2026 – Present | Bengaluru, India

Tech Stack: Google Workspace, Okta, Jamf, Scalefusion, CrowdStrike, n8n, Python, PowerShell, REST APIs

- Design and develop internal automation solutions for IT operations, identity management, SaaS administration and access governance.
- Build API-driven workflows integrating Google Workspace, Okta, Slack, Jira, GitHub and other SaaS platforms.
- Develop internal web applications to replace repetitive administrative workflows and provide centralized IT operations.
- Automate user onboarding, offboarding, access requests, reconciliation, monitoring and administrative tasks.
- Develop and validate automation workflows and internal applications using AI-assisted development tools, APIs, authentication mechanisms, and business logic.
- Collaborate with IT, Security, HR and Engineering teams to identify manual processes suitable for automation.

Selected Automation & Engineering Projects:

ALMP — Internal Asset & IT Management Platform

- Built an internal asset and IT management platform with a FastAPI backend and Next.js/React frontend.
- Implemented REST APIs using FastAPI, Pydantic, and Alembic; implemented JWT, Google OAuth 2.0, and API-key authentication.
- Containerized the application with Docker, published images through GitHub Container Registry, and deployed the application on GCP.

AI Tools Access Request Automation

- Built a Google Apps Script workflow that automatically determines the approver from the selected client/project and requested AI function.
- Applied quota and approval logic to standardize AI tool access requests and reduce manual approval routing.

404 Bot — Slack IT Support Automation

- Developed an internal Slack IT support bot using Gemini AI to analyze queries and provide contextual responses.
- Integrated Slack, Gemini AI, and Jira to automatically create tickets when requests require IT intervention.

User Reconciliation Portal

- Built a user reconciliation platform integrating multiple SaaS applications with HR data to identify active-user discrepancies.
- Automated recurring reconciliation and audit workflows to reduce manual effort and improve visibility into inactive or unexpected accounts.

OAuth Suspension Monitoring & Automated Remediation

- Developed scheduled Google Apps Script monitoring for Google Workspace suspension events and suspension duration.
- Automated group removal, sign-in-cookie clearing, and OAuth-session removal for qualifying inactive suspended accounts, with Slack notifications.

Helpdesk User Management Portal

- Developed a centralized portal for helpdesk identity and access administration without requiring direct Google Admin Console access.
- Integrated Google Groups, SCIM-based group management, Slack group-membership checks, and AI-related cost analytics.

GitHub User Management Automation

- Built an internal GitHub administration tool supporting onboarding, offboarding, repository creation, and user/group management.
- Designed lifecycle workflows with centralized administration and auditability to reduce repetitive GitHub administration.

Plivo Inc - Senior IT System Administrator

Nov 2023 – May 2026 | Bengaluru, India

Tech Stack: Google Workspace, Kandji, JumpCloud, Windows/macOS, CrowdStrike, n8n, PowerShell

- Act as L2/L3 escalation lead for identity, endpoint, MDM and SaaS platform operations across 250+ global users.
- **Google Workspace administration** including provisioning, access control, security policies, API integrations and audit readiness.
- Manage **MDM operations** (Kandji, JumpCloud, ManageEngine, Google MDM) with compliance baselines, patch automation and zero-touch provisioning.
- Led **MDM migration from Kandji to JumpCloud**, including policy rebuild, device transition, testing and zero-downtime rollout.
- Administer and optimize **CrowdStrike Falcon** (detections, RCA, incident workflows, policy updates, device control).
- Support **Windows administration**: AD/GPO, BitLocker, patch cycles, OS troubleshooting, Office issues and remote workforce operations.

Automation, Security & Compliance:

- Built a scalable, event-driven Joiner-Mover-Leaver (JML) automation platform using n8n, AWS Lambda, and Google Apps Script, reducing onboarding time by 60% and improving access consistency.
- Developed serverless automation workflows using AWS Lambda for event-driven integrations and IT operations.
- Built cross-platform API integrations across Slack, Jira, CrowdStrike, Kandji, and Zendesk to streamline alerting and incident workflows.
- Implemented automated secret scanning using Gitleaks to detect exposed credentials and enhance security posture.

- Developed and supported automation workflows for identity lifecycle management, SaaS access provisioning, and IT operations.
- Collaborated with Security and Compliance teams on SOC 2, ISO 27001, and PCI DSS evidence collection and access/asset audit preparation.
- Supported security incident investigations through endpoint diagnostics, system log analysis, and evidence collection using open-source tools aligned with internal security processes.
- Administered access and lifecycle governance for 200+ SaaS applications, including MFA, SSO, access reviews, and privilege audits.
- Supported hybrid AWS and GCP environments, including IAM access and device/endpoint integrations.
- Provided mentorship, technical guidance, and escalation support to junior IT engineers.

DemandNXT Business Services - System Administrator

Jan 2022 – Nov 2023 | Bengaluru, India

Tech Stack: Windows Server, AD/DNS/DHCP, ManageEngine MDM, Microsoft 365, Fortinet, Snipe-IT

- Administered **Windows Server**, AD, DNS, DHCP, Failover Clustering and Group Policies.
- Provided L2/L3 troubleshooting for Windows OS, authentication issues, GPO failures, BitLocker and endpoint performance.
- Managed MDM (ManageEngine, Google MDM) for patching, compliance, device policies and application deployment.
- Configured Fortinet firewalls, segmentation, NAT, VPN and network troubleshooting.
- Managed user lifecycle in **Google Workspace & Microsoft 365** with secure access provisioning.
- Implemented **SPF, DKIM, DMARC** improving domain reputation and reducing spoofing.
- Administered **SendGrid & Mailjet** for sender authentication, deliverability, bounce handling and reputation monitoring.
- Maintained SLA-driven inventory using **Snipe-IT & GLPI** improving accuracy and audits.
- Automated workflows between Zoho CRM and third-party tools to streamline operations.

CMS IT Services (Client: IndiGo) - IT Operations Engineer (L2)

Feb 2021 – Jan 2022 | Coimbatore, India

Tech Stack: Windows, AD, Citrix VDI, VPN, Outlook/Office 365, SentinelOne

- Delivered L2 support for 1000+ users across Windows endpoints, Active Directory, VPN, Citrix VDI and Outlook/Office 365.
- Deployed and maintained endpoint security tools including Forcepoint, SentinelOne and McAfee DLP.
- Supported high-availability airport systems including BRS devices with strict SLA requirements.
- Performed imaging, device provisioning, hardware replacement and break-fix activities.
- Troubleshot network issues, printers and escalated critical outages to senior engineering teams.

24by7 Digitizing – Desktop Support Engineer

Nov 2019 – Jan 2021 | Coimbatore, India

Tech Stack: Windows 10, Active Directory (user support), Office 365, Printers, Hardware Support, VPN (user-level)

- Provided L1/L2 desktop support including system setup, troubleshooting and user access assistance
- Supported hardware, printers and basic network connectivity issues.

Reon Info Tech – Technical Support Engineer

Sep 2017 – Oct 2019 | Coimbatore, India

Tech Stack: Electronics hardware troubleshooting, PCB diagnosis & repair, Arduino programming, embedded components

- Performed electronics hardware troubleshooting and PCB-level fault diagnosis and repair.
- Worked on Arduino-based boards for testing, programming and functional validation.

CERTIFICATION

- Okta Explore Identity Foundations — Completed

PROFESSIONAL DEVELOPMENT

- Okta Administration Certification — In Progress
- OSSEC & Wazuh (SIEM) — In Progress

EDUCATION

B.E., Electronics & Communication Engineering - Coimbatore Institute of Engineering and Technology **(2013 – 2017)**
